Congratulations to all winners, especially to ES5PC for winning Multiband!

Activity was poor on 2m but better on 70cm compared to 2014. 23cm is still THE band, but 10 GHz becomes very popular now, too: At least 34 stations were active in the contest, what seems to be an alltime high.

Activity and entries on 13, 9, and 6cm were about the same as last year, may be slightly less.

Certificates for the first 10 places will be sent out in November.

Congratulations to RU1AA for winning again the 2015 2m Championship! Thanks to all who sent an entry. Entries are about 50% down vs. 2015. This is a clear vote. There are just a few EME Ops left who like to invest some time into a contest, most operators nowadays just hunt for new DXCCs and initials what is totally ok. The effort to promote and evaluate such a contest and send out awards is simply too big for this low level of participation. So, this was the last 2m Digital EME Championship. May be we will be back with another contest concept in the future.

Awards for the top 10 places will be sent out in November.

Congratulations to UA3PTW for winning again the 2015 70cm Championship! Thanks to all who sent an entry. Over 40 stations were active on the band, but just 9 sending an entry. This is the reason why this was the last 70cm Digital EME Championship. We think that there are enough other EME contests (ARRL, ARI) which cover 70cm digital.

Awards will be sent out in November.
